

Invitation to participate in a randomised trial

Have you got trialists to write to?

Unsure how to go about it?

Join

first contact

Summary

Studies cannot be fully represented in a systematic review or meta-analysis unless all relevant information is available.

First Contact is a randomised trial of an intensive method of approaching investigators based on strategies which appear to have worked in other areas.

The trial will investigate whether it is possible to improve success rates when trying to collect data from the original investigators.
